Outline

- ◆ Technical parameters of DPC
- ◆ L1 product data format
- ◆ Chinese aerosol model
- ◆ Aerosol optical depth(AOD) retrieval
- ◆ Conclusion

Technical parameters of DPC

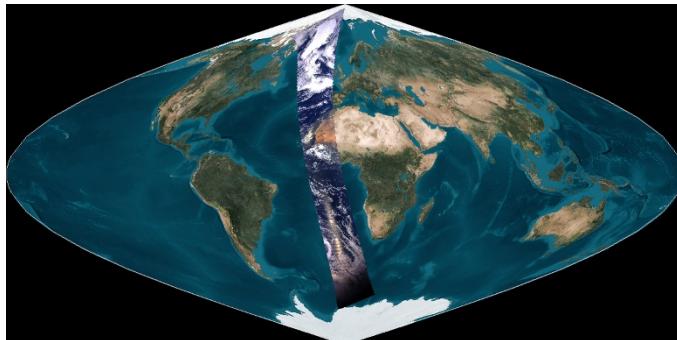

Item	Parameters
Multi-band	443nm, 20nm 490nm (P) , 20nm 565nm, 20nm 670nm (P) , 20nm 763nm, 10nm 765nm, 40nm 865nm (P) , 40nm 910nm, 20nm
Polarization	Line polarization, 0° , 60° , 120°
Field of view	$-50^\circ \sim +50^\circ$
Multi-angle	9 angles along track
spatial resolution at nadir	3.5km
Orbit	sun sync orbit
Orbit height	705km

L1 product data format

- Each band data is saved as individual H5 format file
- Quick view
- xml file contain the auxiliary information

Chinese aerosol model

AERONET stations in China

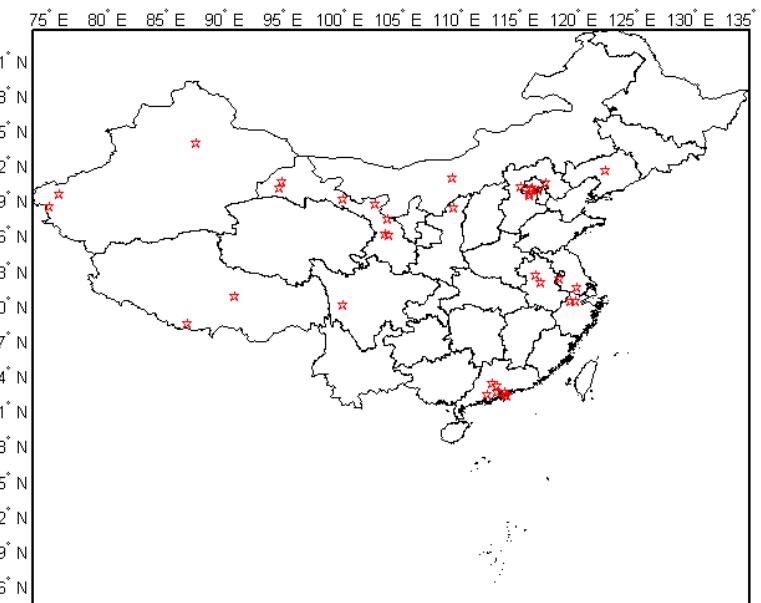

36 AERONET stations
2001-2018

Chinese aerosol models

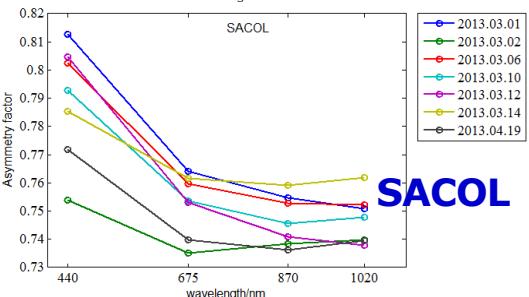

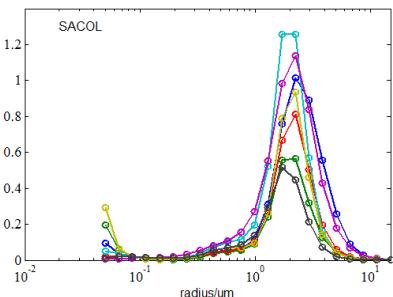

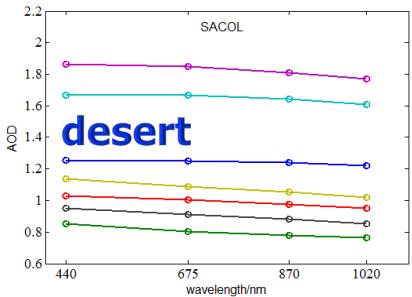

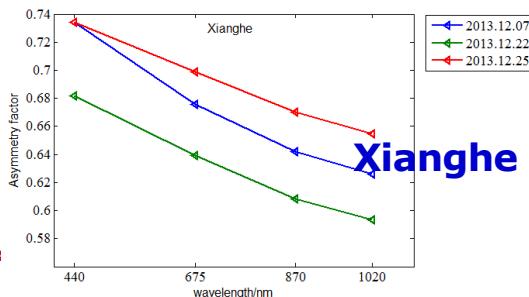

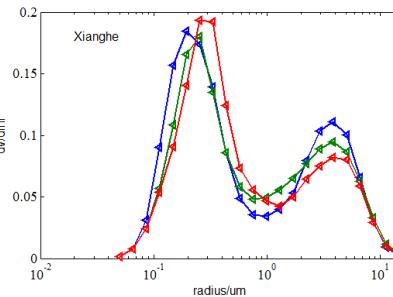

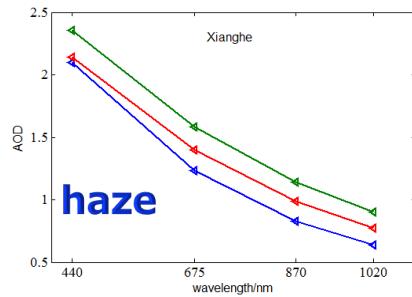

aerosol LUT

Chinese aerosol model

haze and desert aerosol

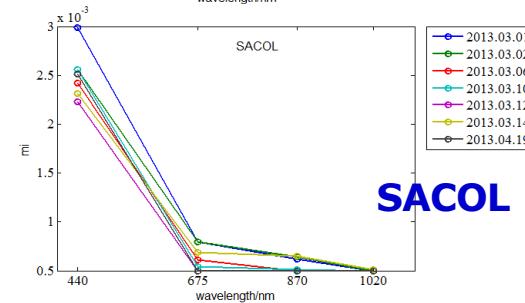

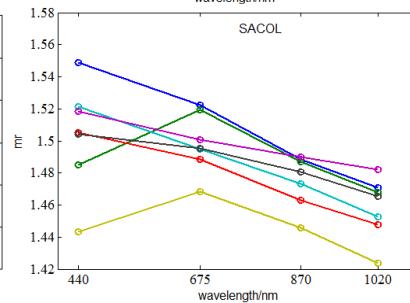

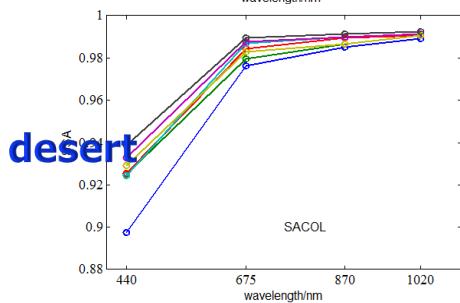

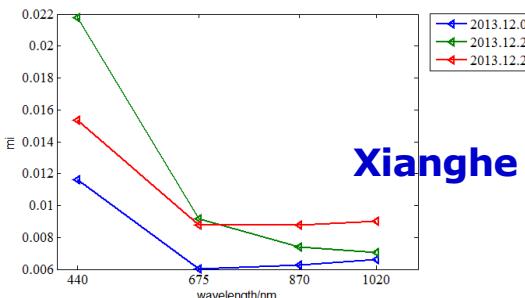

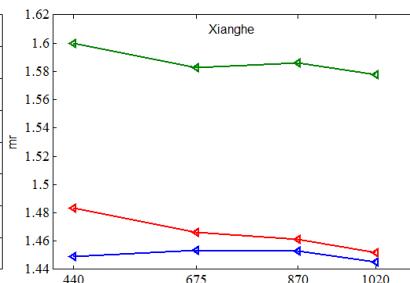

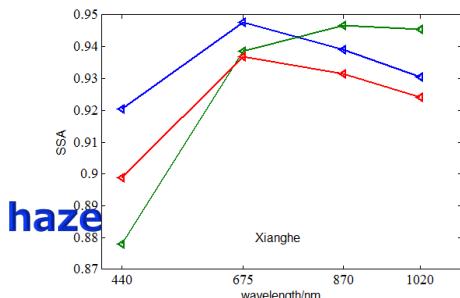

- Xianghe station (Beijing) : winter data to study on the haze aerosol
- SACOL station (Lanzhou, semi-arid region) : spring data to study on the desert aerosol

Chinese aerosol model

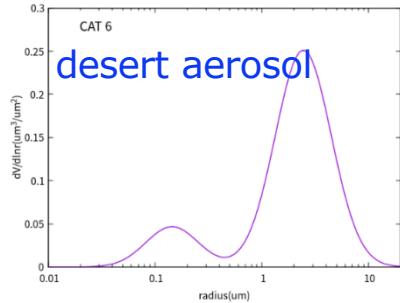

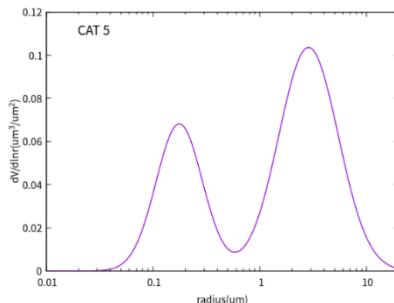

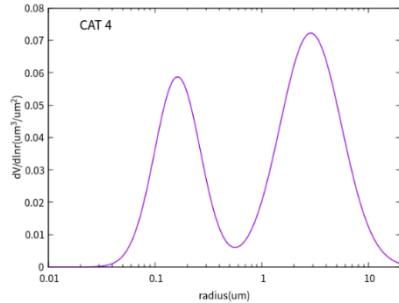

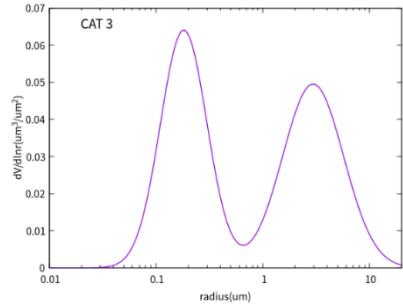

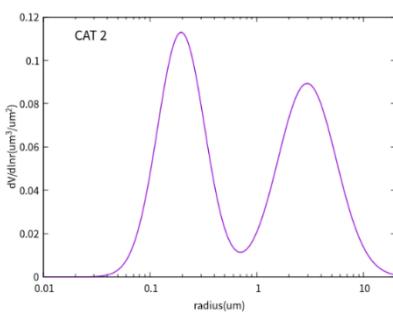

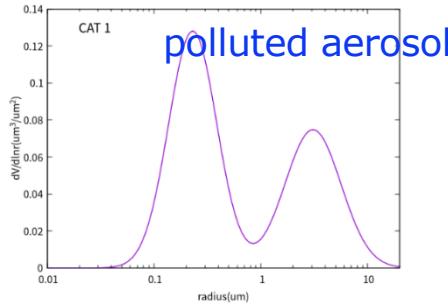

haze and desert aerosol

- SSA of haze and desert have different changing trend with wavelength
- The desert has lower image refractive index than haze, desert aerosol absorption capacity is weak

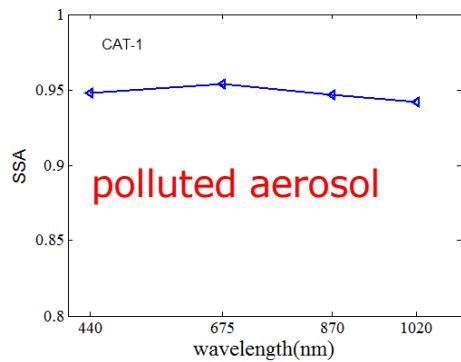

Chinese aerosol model

Cluster the AERONET data over China into 6 categories.

Summary

- **L1 product data format of DPC**
- **Clustering aerosols into six categories**
- **Preliminary AOD results over eastern China obtained by DPC**

Thank You for your attention !
